Professional Summary

Software Engineer with experience building, automating, and supporting enterprise systems and AI-enabled applications across cloud, web, and infrastructure environments. Strong background in reducing manual operations through tooling, scripting, and secure self-service platforms. Proven ability to work in high-risk, compliance-driven environments while improving reliability and efficiency.

Technical Skills

Backend and Cloud:

- ASP.NET, Python, Django
- Azure, IIS, Windows Server
- REST APIs, Authentication, SSO

DevOps and Tools:

- Git, GitHub, Azure DevOps, ServiceNow
- CI/CD, Application Support

Frontend:

- React, Angular, Next.js, HTML, CSS, Bootstrap

AI & Automation:

- Keras, Google Colab, GitHub Copilot, ChatGPT
- Zoho, Google Sheets, Microsoft 365/Outlook

Database:

- SQL Server, Oracle, MySQL, Firebase

Soft Skills:

- Problem Solving, Adaptability, Attention to Detail, Active Listening, Team Collaboration, Stakeholder Communication

Experience

AI Integration & Automation Specialist - ProCalcs | Mar 2026 - Oct 2026

- Developed and tested synchronization workflows between Zoho and Google Sheets
- Developed Microsoft 365/Outlook integrations supporting design-process workflows
- Contributed to SongProIQ, a Next.js songwriting coaching application with an AI mentor

Associate Software Engineer - Accenture - Ebloc 2, IT Park, Cebu (Hybrid) | Aug 2024 - Feb 2026

- Supported and maintained 15+ enterprise applications across multiple sites, ensuring high availability in compliance-driven environments
- Designed and developed the SAM self-service platform (.NET API + Angular) to automate password resets and account unlocks, reducing ticket volume
- Automated recurring operational tasks using scripting, cutting manual workload and incident response time
- Coordinated with DBAs, infrastructure, and security teams on application upgrades and database migrations
- Managed large-scale service and database account rotations while ensuring system continuity and audit compliance

Web Developer Intern - Above Digital - Australia (Remote) | Jan 2024 - Jun 2024

- Developed and maintained WordPress sites from Figma designs
- Built responsive components using React, HTML, CSS, and Bootstrap
- Implemented headless WordPress integrations with React via REST APIs
- Worked in a fully remote agile team using Git-based workflows

Project Highlights

Estimate Pro - ProCalcs | 2026

- Contributed to an AI-assisted HVAC estimating platform that turns plans and email inputs into reviewable estimates
- Developed pricing, approval, and email-delivery features for PDF estimates and Outlook draft replies

Zoho Sheet Sync - ProCalcs | 2026

- Developed Zoho-Google Sheets integration for project-data synchronization
- Implemented incremental updates and data reconciliation across connected systems

SongProIQ - ProCalcs | 2026

- Contributed to an AI-powered songwriting coaching application built with Next.js
- Enhanced conversational AI mentoring and audio analysis for songwriting feedback

SAM (Self Account Management Tool) - Accenture Internal Project | April 2025 - Feb 2026

- Built an enterprise-grade self-service portal for password resets and account recovery
- Developed secure REST APIs in .NET and frontend in Angular
- Integrated Azure AD SSO and role-based access control
- Reduced dependency on manual support workflows and improved security compliance

Education

BS in Information Technology - Cebu Technological University - Ginatilan Extension Campus
- Graduated: 2024
